

21 April 2021

The Board of Directors of the Tesla Club of Southern Arizona (The Board) have agreed to resume outdoor events for the benefit and enjoyment our members and the public. The Board understands that the COVID-19 Pandemic still poses a health risk within our community. We expect that everyone will make their own decisions on attending and practice personal responsibility at our events

The Board acknowledges this is a personal decision, but we encourage you to follow the recommended health and safety protocols for COVID-19 including social distancing and/or mask use and hand sanitation for your safety and the safety and comfort of your fellow attendees at an event.

Should an event be held within the bounds of a business or organization, we will abide by the requirements of that business or organization, consistent with our member code of conduct. Any member not complying with the rules set forth by the business or at the request of an employee or representative, will be asked to leave.

As always, our events will be posted on the website, published in our newsletter and on social media. Our Zoom events will continue as well.
